TRAVEL SAFE GUIDELINES

2 March 2021

Version 1.0

About HTNG

Hospitality Technology Next Generation (HTNG) is a non-profit association with a mission to foster, through collaboration and partnership, the development of next-generation systems and solutions that will enable hoteliers and their technology vendors to do business globally in the 21st century. HTNG is recognized as the leading voice of the global hotel community, articulating the technology requirements of hotel companies of all sizes to the vendor community. HTNG facilitate the development of technology models for hospitality that will foster innovation, improve the guest experience, increase the effectiveness and efficiency of hotels, and create a healthy ecosystem of technology suppliers.

TABLE OF CONTENTS

1 This Document at a Glance

This document is focused on how new protocols and policy changes can be shared through distribution channels to ensure a guest has appropriate information at their fingertips prior to as well as throughout the booking process. Although much of this information has been created in response to the COVID-19 pandemic, many of the specific protocols and policy changes may be used in other situations and have been designed to do so.

2 Document Information

2.1 Document History

Version	Date	Author	Comments
0.01	30 OCT 2020	Sandy Angel	Initial document creation
0.02	06 JAN 2021	Sandy Angel	Inclusion of Search, Availability and Reservation Messages
0.03	14 JAN 2021	Sandy Angel	Inclusion of Meeting and Transient RFP Messages
1.0	02 FEB 2021	Sandy Angel	Publication

2.2 Document Purpose

In response to the COVID-19 pandemic, hotels and resorts have a need to share new protocols and services with guests prior to and throughout the booking process. Through HTNG's Travel Safe Workgroup, new codes were added to the OpenTravel Code List to enable sharing these protocols and services as well as changes to existing protocols and services in the distribution channel which many properties already use.

The workgroup responsible for identifying and adding the new codes to the OpenTravel Code Lists and creating this document was composed of members from the Hotel Electronic Distribution Network Association (HEDNA), Hospitality Technology Next Generation (HTNG) and the OpenTravel Alliance, as this was a joint initiative of these three associations.

This publication features aggregated guidance with the help of our member organizations, the US Center for Disease Control (CDC), the World Health Organization (WHO) and their regional and global counterparts, allowing updates where necessary to provide guidance and direction in the use of codes and their detailed descriptions. These codes are intended to support the standardization of communication and an understanding throughout all hospitality distribution methods globally. The codes are also designed to enable clarity and transparency for a traveler's journey.

2.3 Scope

The scope of this document is limited to such codes that were deemed useful and necessary in the context to the COVID-19 pandemic at the time of creation in 2020.

These codes were created to be used in the following messages:

- OTA_HotelDescriptiveContentNotifRQ
- OTA_HotelDescriptiveInfoRS
- OTA_HotelAvailRQ
- OTA_HotelAvail RS

- OTA_HotelSearchRQ
- OTA_HotelSearchRS
- OTA_HotelResRQ
- OTA_HotelResRS
- OTA_HotelResNotifRQ
- OTA_HotelResNotifRS
- OTA_HotelResModifyRQ
- OTA_HotelResModifyRS
- OTA_HotelResModifyNotifRQ
- OTA_HotelResModifyNotifRS
- OTA_HotelRFP_MeetingRQ
- OTA_HotelRFP_MeetingRS
- OTA_HotelRFP_MeetingNotifRQ
- OTA_HotelRFP_TransientRS
- OTA_HotelRFP_TransientNotifRQ

2.4 Useful Resources

- Implementing Web Services Using HTNG Specifications – A Quick Start Guide for Software Developers
- AHLA - Safe Stay
- OpenTravel Code List
- HTNG Specifications
- Open Travel Alliance Specifications

2.5 Audience

The target audience for this effort includes hospitality distribution partners and the vendors and operators focused on communication, distribution and RFP/RFI development. The terminology and codes throughout this document will be utilized to support automated transmissions and standardization of these communications.

2.6 Overview

HTNG's Travel Safe Workgroup has reviewed existing messages and made recommendations on changes to support new safety and health requirements. Phase I of the group reviewed the existing hotel content messages and Phase II reviewed the existing search, availability, reservation and request for proposal (RFP) messages, and it determined where new codes should be added to support the new requirements. The identified codes have been submitted to OpenTravel through the organization's code list request process. The results are included in Section 4 – Code Amendments.

Although a fair number of codes were added to the code lists, not all implementers will make use of every code. Hoteliers should work with their distribution partners to identify which codes are appropriate for their properties to ensure their partners are able to accept the codes they choose to implement. The codes that have been identified (both new and existing) in this document may be used to initiate the conversation between distribution partners, keeping in mind that a subset of these codes may be used separately from hotelier to hotelier.

Additionally, depending on how each entity interacts with a guest, these codes may not require implementation in each of the previously defined messages. It is important that a guest is given this

information during the search, availability, booking and RFP processes. But, whether that is contained within the messages themselves or pulled from a database and displayed in another format is an implementation decision.

This group encourages users to recognize that services and amenities might change over the time of the buying/booking journey. What is displayed during a search, a reservation and finally, experienced when on-property may not all be the same. Therefore, a proactive approach is recommended to inform guests where they can find the most recent list of services and amenities relevant to their reservation and stay.

3 Pre-Arrival Considerations for New Protocols

Each of the following business scenarios describes a specific business situation for which the travel safe codes may be relevant. These examples are intended to show how the codes may apply for sharing hotel protocols with guests prior to arrival.

3.1 Cleaning Protocols

A guest is planning a stay in New York City and is concerned about the cleaning protocols at the hotel in light of the current health crisis. The guest wishes to understand what processes are in place for ensuring both the room and public spaces within the hotel are properly cleaned and sanitized. The guest's hotel choice will ultimately be driven by their comfort level with the hotel's current policies in place.

3.2 Check-in/Check-out

A guest planning to stay in Miami is concerned about limiting surface contacts and wants to understand the available options for contactless payments during the check-in or check-out processes.

3.3 Temporary Closure of Facilities and Services

Considering the fluid nature of the availability of certain facilities and services due to local government mandates, a guest planning to stay in San Francisco wants clarity on what facilities and services, if any, will be temporarily unavailable during their scheduled stay.

3.4 Housekeeping

A guest planning to stay in London is concerned about hotel staff entering their room after check-in and would like to understand if housekeeping can be on a 'request-only basis' for the duration of their stay.

4 Code Amendments

In this section, codes that have been added to specific code lists will be identified as well as codes that previously existed in the lists that are relevant for this effort.

Many codes are intentionally broad to allow a hotel to provide further detail specific to their property(ies). Throughout the messages, additional fields are listed which may be used in conjunction with the code fields to provide further information. One such field is CodeDetail, a string field, which allows the sender to provide more information related to the specified code. For example, the CodeDetail field may be used in conjunction with HAC code #353 – Cleanliness Certification to specify with which cleanliness program the hotel is certified.

4.1 HAC – Hotel Amenity Code
The Hotel Amenity Code (HAC) is used for codes that apply at the hotel level.

4.1.1 Code Additions

Code Table	Code Value	Code
HAC	353	Cleanliness Certification
HAC	354	Contactless payment available during check in/out
HAC	355	Wrapped disposable or metal straws
HAC	356	Individually sealed disposable utensils available
HAC	357	Individually packaged food options
HAC	358	Additional cleaning services
HAC	359	Contactless in-room dining
HAC	360	Hotel staff allowed to enter a hotel room once a guest has checked in
HAC	361	Staff's access to guest rooms subject to the guest's authorization
HAC	362	Buffets or plated meals served only by employees/attendants
HAC	363	Pre-packaged breakfast items
HAC	364	Non-touch operations available in public bathrooms

HAC	365	Measures are in place to avoid guests handling food at buffets
HAC	366	Self-service food utensils replaced frequently
HAC	367	Luggage stored per group of guests
HAC	368	Non-shareable food and beverage menus provided
HAC	370	Controlled occupancy in elevators/lifts
HAC	371	Property air purification system
HAC	372	Allergy friendly rooms
HAC	373	Medical grade air purification system
HAC	374	Testing and tracing policies
HAC	375	AHLA Safe Stay compliant

4.1.2 Existing Relevant Codes

Code Table	Code Value	Code
HAC	1	24-hour front desk
HAC	18	Check-in kiosk
HAC	28	Doctor on call
HAC	31	Drug store/pharmacy
HAC	36	Express check-in
HAC	37	Express check-out
HAC	143	Dinner delivery service from local restaurant
HAC	149	Grocery shopping service available
HAC	169	24-hour food & beverage kiosk

HAC	177	Limited service housekeeping
HAC	211	Lobby coffee service
HAC	249	Carryout breakfast
HAC	311	Room air filtration
HAC	313	Water purification system in use
HAC	349	Mobile/Digital Check-in
HAC	350	Mobile/Digital Check-out
HAC	352	Enhanced Hygiene/Cleanliness Protocols

4.2 MRC – Meeting Room Code

The Meeting Room Code (MRC) is used for codes that apply at the meeting room level.

4.2.1 Code Additions

Code Table	Code Value	Code
MRC	208	Pens and writing pads upon request
MRC	209	Virtual site inspection available
MRC	210	Meeting space capacities and configurations follow social distancing guidelines
MRC	211	Food and beverage stations include protective sneeze guards
MRC	212	Third-party partners comply with property's cleanliness standards
MRC	213	Live-streaming meetings capabilities enabled
MRC	214	Direct access to outdoor space
MRC	215	Windows open for ventilation
MRC	216	Group sizes may be limited

Code Table	Code Value	Code
MRC	217	Single serve food and beverage options available

4.2.2 Existing Relevant Codes

Code Table	Code Value	Code
MRC	42	Separate entrance
MRC	43	Separate registration area
MRC	97	Portable wall rooms
MRC	98	Non portable wall rooms
MRC	121	Teleconferencing

4.3 OTC – Option Type Code

The Option Type Code (OTC) is used throughout the message to specify an option type related to another code.

4.3.1 Code Additions

Code Table	Code Value	Code
OTC	8	Temporarily unavailable

4.3.2 Existing Relevant Codes

Code Table	Code Value	Code
OTC	4	Not available

4.4 REC – Recreation Service Detail Code

The Recreation Service Detail Code is used for codes that apply at the recreation level. Please note that the REC code list is used in conjunction with the RST Recreation Service Type code list which specifies the type of activity or facility that the REC code relates to.

4.4.1 Code Additions

Code Table	Code Value	Code
REC	98	Contactless payment available
REC	99	Disinfectant wipes available
REC	100	

		Lockers are assigned to ensure social distancing
REC	101	Lockers are pre-locked to prevent contamination
REC	102	Private spaces designated
REC	103	Disinfected after each use
REC	104	Frequently disinfected
REC	105	Reservation required
REC	106	Limited occupancy

4.4.2 Existing Relevant Codes

Code Table	Code Value	Code
REC	34	Appointment Required

4.5 RMA – Room Amenity Code

The Room Amenity Code is used for codes that apply at the room level.

4.5.1 Code Additions

Code Table	Code Value	Code
RMA	284	Wrapped coffee and condiments packages
RMA	285	TV remotes disinfected
RMA	286	Extraneous room amenities removed
RMA	287	Electronics controlled by personal mobile device
RMA	288	TV controlled by personal mobile device
RMA	289	Voice enabled room controls
RMA	290	Room air purification system
RMA	291	Allergy friendly room

Code Table	Code Value	Code
RMA	292	Medical grade air purification system
RMA	293	All surfaces sanitized between stays

4.5.2   Existing Relevant Codes

Code Table	Code Value	Code
RMA	121	Water purification system
RMA	243	Outdoor space
RMA	247	Room windows open
RMA	278	Roof ventilator

4.6   RSI – Restaurant Service Info

The Restaurant Service Info code is used for codes that apply at the restaurant level.

4.6.1   Code Additions

Code Table	Code Value	Code
RSI	23	Contactless payment available
RSI	24	Table spacing/reduced occupancy follows local guidance
RSI	25	Restricted to hotel guest use only
RSI	26	Outdoor seating available
RSI	27	Heated outdoor seating available
RSI	28	Year-round outdoor seating available

4.6.2   Existing Relevant Codes

Code Table	Code Value	Code
RSI	7	Meals to go
RSI	8	Room service
RSI	9	Self service

Code Table	Code Value	Code
RSI	10	Special meal services
RSI	11	Take out

4.7 SEC – Security Feature Code

The Security Feature Code is used for codes that are specifically related to security and safety throughout the hotel.

4.7.1 Code Additions

Code Table	Code Value	Code
SEC	109	Social distancing measures deployed
SEC	110	Signage deployed to facilitate social distancing
SEC	111	Physical barriers deployed to facilitate social distancing
SEC	112	Floor markers deployed to facilitate social distancing
SEC	113	Physical spacing required to facilitate social distancing
SEC	114	Personal protective equipment worn by hotel staff
SEC	115	Hospital grade disinfectants used
SEC	116	Masks required for all in public spaces
SEC	117	Contaminated rooms quarantined
SEC	118	Hotel disinfects luggage
SEC	119	Disinfecting electrostatic spray used upon check-out
SEC	120	Disinfecting electrostatic spraying used in public spaces
SEC	121	Hand sanitizer stations in high traffic public spaces

SEC	122	Communicate proper health and safety procedures to staff and guests
SEC	123	Local law requires guests to complete a health declaration form at check-in
SEC	124	Property limits number of guests in food and beverage areas
SEC	125	Masks available
SEC	126	Latex free gloves available
SEC	127	Disinfecting wipes available
SEC	128	Hand sanitizer available
SEC	129	Designated waste bins to collect hazardous material available
SEC	130	Hotel sanitize or dispose of key cards after each use
SEC	131	Pools and/or spas chemicals are maintained and meet local jurisdiction
SEC	132	Contractors/vendors informed of local health and safety regulations
SEC	133	Enhanced laundry care for contaminated linens
SEC	134	Temperature check performed
SEC	135	Rapid testing
SEC	136	Proof of negative test
SEC	137	Proof of vaccination
SEC	138	Guest accommodations sealed after cleaning
SEC	139	All bedding cleaned between guest stays
SEC	140	

Code Table	Code Value	Code
		Linens and laundry washed in accordance with local authority or brand guidelines
SEC	141	All linens sanitized in high temperature wash
SEC	142	Shared use equipment removed
SEC	143	Contact tracing in accordance with local authorities
SEC	144	Masks required on hotel provided transportation
SEC	145	Reduced occupancy to ensure social distancing on hotel shuttle
SEC	146	Hotel provided transportation disinfected frequently

4.7.2 Existing Relevant Codes

Code Table	Code Value	Code
SEC	12	Doctor on call
SEC	32	Multiple exits on each floor
SEC	42	Room accessible through balcony sliding glass doors
SEC	43	Room windows open
SEC	51	Some guest rooms have a balcony
SEC	59	Ventilated stairwells
SEC	106	Health club facilities (pool/gym) require key access for entrance
SEC	108	Digital key/Mobile key

5 Messages

Specific OpenTravel messages make use of enhanced code lists. Below there are messages that reference the lists identified in this document and the x-paths to where within the message they can be found.

In many locations within the messages there are other fields that could be useful to convey additional information regarding a specific code such as code detail, operation schedule, or even two code lists used in conjunction with each other. Please refer to the message itself for available fields location by location.

5.1 OTA_HotelDescriptiveContentNotifRQ

The OTA_HotelDescriptiveContentNotifRQ is a broadcast message used to publicize detailed descriptive information about a hotel property by standardized data categories. Likewise, static information about a hotel property can be obtained by using the Hotel Search Request and/or Hotel Availability Request to search for static information by category, using codes agreed upon between trading partners to request more detail about a hotel.

The Hotel Descriptive Content interface enables accessing hotel data in both a push and pull format in order to avoid storing the data at multiple locations. In most cases, the hotel property is the owner of the data and is in charge of updating. It also sends out a broadcast message as a full overlay to replace previous information, or a partial update message modification to make changes to portions of the data.

5.7 OTA_HotelResRQ

The OTA_HotelResRQ message sends a request for a reservation to another system. There is no requirement to determine availability prior to sending a reservation request. Travel agencies or individual guests may send a request to book a reservation from an Internet site if all the information required for booking is known. The OTA_HotelResRQ message can initiate the first message in the sequence of booking a reservation.

5.8   OTA_HotelResRS

The OTA_HotelResRS message can be used to respond to an OTA_HotelResRQ or the OTA_ReadRQ. The response to a booking request is either 'Yes' or 'No' based upon the availability. The hotel PMS or CRS system responds back, attaching a confirmation number or additional information such as the reservation ID when the response is affirmative. Additional information, such as the count of loyalty program miles or points to be awarded for the hotel stay, can be added to the reservation object in the return. Supplementary data for the reservation can be added later once the reservation has been confirmed and the inventory is held.

5.9 OTA_HotelResNotifRQ

The OTA_HotelResNotifRQ message supports the functionality of updating other systems with
reservation data. The message assumes a push model, with the originating system pushing the data to
another system. The originating system would usually be a booking source, such as a Global Distribution
System (GDS), a Central Reservation System (CRS) or some other agent of the hotel.

5.11 OTA_HotelResModifyRQ

The OTA_HotelResModifyRQ is a request message for modifying a reservation. It is used for a full overlay of the reservation. When changing data that requires an availability check, this message assumes the availability is known (if availability is not known an availability check containing the reservation ID may be useful).

5.13 OTA_HotelResModifyNotifRQ

The OTA_HotelResModifyNotifRQ is a notification request message (push message) for reservations that were modified. It is used for a full overlay of the reservation. When changing data that requires an availability check, this message assumes the availability is known (if availability is not known an availability check containing the reservation ID may be useful).

5.19 OTA_HotelRFP_TransientNotifRQ

The transient RFP supports the buyer to supplier process of negotiating room rates and amenities for a given contract period. The buyer is the corporation negotiating directly with the supplier (for example, hotel chains or individual hotels). The OTA_HotelRFP_TransientNotifRQ is sent by the hotelier. The response sends detailed information as previously requested or updated information regarding an RFP.

5.19.1 HAC – Hotel Amenity Code List

6 Appendices

6.1 Glossary of Terms

For the purpose of this document the following terms have been defined as follows:

Term	Definition
AHLA	American Hotel & Lodging Association
CRS	Central Reservation System
HEDNA	Hotel Electronic Distribution Network Association
HTNG	Hospitality Technology Next Generation
OTA	OpenTravel Alliance
PMS	Property Management System
RFI	Request for Information
RFP	Request for Proposal
RQ	Request transaction
RS	Response transaction
X-Path	X-Path is a major element in the XSLT standard. X-Path can be used to navigate through elements and attributes in an XML document.

6.2 Implementation Notes

The overall goal is to create predictability and awareness throughout travel distribution messaging. However, adoption of specific codes will vary for each organization depending upon the relevance to each specific organization.
